"For The Health Of Your Horse"

Stall Genie Product Application Guide

Read this informative article and learn how you can use the combination of Stall Zyme and Stall Genie Granules to block odor and absorb harmful ammonia in your horse stall bedding. Stall Genie Granules are available in multiple Sizes, are easy to scoop, effective and safe. Stall Genie Granules are all natural, and provides maximum odor control, while Stall Zyme continues to eat ammonia long after its application.

Stall Genie and Stall Zyme was developed to reduce ammonia and moisture in stalls and stables. Ammonia gas is the leading cause of respiratory problems. Moisture contamination is responsible for the development of molds, bacteria and fungus, which are a major cause of disease, especially in foals.

Application of Stall Genie allows the Capture of Ammonia, which over time will allow your horse to perform better by having fewer Non Noticeable respiratory problems. ***Why do you think you can see blood coming out of Race Horses nostrils while running...bleeding from the lungs...use of our system over time will reduce or eliminate that, and will allow all equine Athletes to perform better with fewer vet bills.***

Apply the Stall Genie system in your horse stall or trailer, with these 8 simple steps.

Step 1: Spray Stall Zyme over the area and allow to dry. If mats are in the stall or trailer, roll back and spray both sides if possible. Stall Zyme will continue to eat residual ammonia even after drying.

Step 2: After allowing your Stall Zyme application to dry, get handy your Stall Genie Granules in pail or bag form.

Step 3: Pour granules into a small container for ease of spreading (optional)

Step 4: Spread granules lightly over the horse bedding area

Step 5: Make sure the granules are evenly applied

Step 6: Apply the bedding material of your choice over the granules

Step 7: Spread bedding evenly over the granules

Step 8: When the bedding is completely laid down, a handful of Stall Genie Granules also needs to be put in the area of the bedding where horse urinates and one where it defecates.

Congratulations, you are now done and on track to improve the health of your horses!
